Summary

I am a sophomore at the Federal University of Technology, Akure currently pursuing a bachelor's degree in Software Engineering.

I have experience in frontend web development, version control systems, Linux and Windows environments from college coursework, online boot camps and courses, and I hope to expand my skill set to include backend development, mobile app development and machine learning.

I enjoy working in collaborative, fast paced work environments, and I'm also looking for opportunities to grow and apply my skills.

Education

Federal University of Technology Akure
